Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The first line of independent claims 1 and 17 recite the alternative expression "evaluating duration and/or shape characteristics" which is vague and indefinite in that one cannot tell whether both shape and duration meets the definition of the claim or whether either shape or duration alone is sufficient to meet the terms of the claim, See MPEP 2173.05(h).

Claims 11-16 and 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims contradict their respective parent claims in that they recite that only one of either "duration" or "shape" is being measured while their parent claims recite (by the use of "and/or") that both duration and shape are included in the scope of the claims. A dependant claim cannot recite a combination of fewer elements than it's parent claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 10 and 17-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hughes et al. (6,697,209). Claims 1-4, 10 and 17-18 recite the invention illustrated in applicant's Figure 1, Hughes et al. (6,697,209) shows, in Figure 11, a combination identical to applicant's Figure 1 (with the exception of the capacitors C_1 to C_n , which are not included in claims 1-4, 10 and 17-18).
